LOURENCE ANOTIDA RUHWAYA

IT Support | Networking | Systems Administration

11 Peterfolk, Athlone, Bulawayo, • +263788822510 • rushanotida@gmail.com LinkedIn: Lourence Anotida Ruhwaya • GitHub

PROFESSIONAL SUMMARY

IT professional and final-year BSc Computer Science (Honours) student with a year of hands-on experience at Old Mutual Zimbabwe (Omari fintech platform) providing end-user IT support, hardware setup and configuration, user account administration, and staff training in a high-availability financial services environment. Built and ran the company's IT help desk (ticketing) system and an IT asset/stock tracking system, administered the corporate Google Workspace domain, and supported Microsoft 365 users, printers, and peripherals across head office and remote remittance centres. Holder of Google IT Support Professional and Google System Administration & IT Infrastructure certifications, with solid networking fundamentals (TCP/IP, DNS, DHCP) and a strong interest in network infrastructure and systems reliability. Proactive, detail-oriented, and eager to contribute in a permanent IT role.

CORE TECHNICAL SKILLS

End-User IT Support: Desktop/laptop troubleshooting (Windows & Linux), printers and peripherals (incl. network printer connectivity and proxy/IP configuration), hardware and software installation, workstation setup for new employees

Networking: TCP/IP, DNS, DHCP, IP addressing, network troubleshooting, switches and access points (fundamentals), firewall and proxy concepts; interest in structured cabling and physical network infrastructure **User & Systems Administration:** Microsoft 365 support, Google Workspace administration (account provisioning, permissions, password resets, security alert monitoring), system administration basics, Google Cloud, Docker

Help Desk & Asset Management: Built and operated an IT ticketing/help desk system; designed an IT stock and asset tracking system covering procurement, distribution, and usage

Software & Tools: Python, JavaScript/TypeScript, HTML/CSS, Django, React, MySQL, PostgreSQL, Git/GitHub, Adobe Photoshop & Illustrator

Training & Documentation: End-user training delivery, handover documentation, clear written and verbal communication

WORK EXPERIENCE

IT & Software Development Intern Aug 2025 –May 2026 *Old Mutual Zimbabwe – Old Mutual Digital Services (Omari fintech platform), Harare* • Designed, built, and supported the organisation's IT help desk ticketing system used to log, categorise, assign, and resolve technical support requests from head office, agents, and remittance centres — replacing an informal process with structured tracking, email notifications, and a management dashboard.

- Administered the corporate Google Workspace domain (omari.co.zw): provisioned and managed user accounts and permissions, performed password resets, monitored security alerts for suspicious logins, and resolved email/spam issues.
- Set up and configured hardware for staff — including procuring and arranging configuration of laptops and peripherals for new employees in coordination with the IT infrastructure team. • Provided day-to-day end-user support for desktops, laptops, Microsoft 365 and Google Workspace applications, and office printers — including diagnosing and resolving network printer connectivity issues (IP/proxy configuration on a Xerox B405).
- Developed an IT stock/asset tracking system (OMCard) giving real-time visibility of inventory levels, distribution by branch and region, and usage monitoring — replacing a manual spreadsheet process. • Delivered training sessions and ongoing technical support to operations staff on internal systems

(Lazarus Smart BI and the help desk system), including walkthroughs, troubleshooting, and handover documentation.

- Built a Remittance Centre Performance Tracker and a five-module Wallet Analytics Dashboard used by management for real-time operational reporting.
- Supported 30+ merchant, partner, and bank integrations (ZB Bank, POSB, Stanbic, Zimra) — API key provisioning, UAT support, and live troubleshooting of failed transactions, including escalation of third party KYC API failures.
- Participated in Omari mobile app User Acceptance Testing across three release versions, documenting defects and verifying fixes.

Student Intern Dec 2024 – Feb 2025 *Cliopatra Graphics, Witbank, Mpumalanga, South Africa*

- Developed and designed client websites using Django and React; created branding and marketing materials.
- Assisted with bookkeeping and financial data management while handling multiple client projects to deadline.

KEY PROJECT

- **QikNet —** WiFi Voucher Sales & Access Management System (client-initiated): designed and built a platform for selling and managing prepaid WiFi hotspot access vouchers, with integrated EcoCash payments via Paynow. Covers voucher generation and redemption, payment confirmation, and sales tracking. Built with Node.js, TypeScript, Express, and MySQL (Prisma). Demonstrates hands-on interest in network access management and end-to-end ownership of a connectivity product. (github.com/Anotida28/QikNet)

EDUCATION

BSc (Honours) Computer Science — Final Year, expected May 2027
National University of Science and Technology (NUST) — GPA 3.39/4.0 (Upper Second Class equivalent)

Advanced Level (2021)
Sacred Heart College — Pure Mathematics, Geography, Computer Science, General English

CERTIFICATIONS

- Google IT Support Professional Certificate
- Google System Administration & IT Infrastructure Services
- CompTIA Cloud+ (Advanced)
- Cisco Introduction to Cybersecurity
- Certified Ethical Hacker (CEH)
- Google AI Essentials • IBM AI Fundamentals
